**KASTELAAR FOR YOUR WINTER PASSIONS**

**kastelaar**  
1936

# YOU'RE ARE THE CHAMPION

# WHITE PASSION SINCE 1936

*The widest ecological winter collection existing on the market*

Kastelaar is now able to offer the widest ecological collection existing on the market: innovative solid wood skis for alpine, free-skis, cross country, backcountry, monoskis and snowboards.

Skiing and surfing on the snow with our high performance ecological equipment is a unique experience, difficult to explain.

They were used for two seasons in the F.I.S World Cup and in the Freeride World Tour and in all conditions.

It is therefore not an aesthetic discourse, but goes much further: it is trying to make you happy and satisfied, giving you

maximum pleasure possible in a day on the snow in harmony with nature.

Our products are designed to last as long as possible and do not follow the logic of consumerism.

They wear less than the others and is also easy to get them in shape.

Products which are not thrown, but rather collect and which are able to offer the same performance for a higher number of cycles of fatigue of any other similar product on the market.

This is the winning philosophy of Kastelaar, for Nature and for all of us since 1936.

# KASTELAAR SKIS BRIEFLY

*ecology + design + engineering + tradition for our white and free passions*

ECOLOGICAL

LIGHT

STRONG

REPAIRABLE

## **Innovations**

*Over twenty innovations and technical solutions never applied before in a ski.*

*The Kastelaar are not limited to be “aesthetic” ski, but are rich in content and technological solutions, although not particularly visible... structural solutions that minimize the use of polluting auxiliary materials...*

## **Performances**

*Reduced by 50% vibration than other skis, stability, superior grip on all snows, good contact snow-skier that translate into speed, fluidity, safety, reduced muscle strain for the same route taken.*

*In addition to high quality structure in solid wood and materials from the aerospace industry, base competition and special steel cut edge...*

***Because they are better than the other skis and more? Because you ski whit four skis and not two.***

*Here is the secret of the Kastelaar (reconfirmed in the laboratory of mechanical engineering).*

*From 0 up to 20 degrees the tip does not snow engage: (no potential injuries and distortions due to this) and even at 60 degrees has little pressure: this always allows to manage the curve radius. Skiing is always light and not tired. In practice it is always the skier with his weight, his technical skill and his way of skiing, more or less aggressive, controlling and managing the ski and not the opposite: maximum safety and maximum ski control with great advantage from the technical point of view and physical fatigue.*

*As Francesco Canale, alpine guide said:*

*“It’s like having two pairs of skis: easy in the “easy” and techicale when needed. A wonderful compromise”.*

## LESS MICROTRAUMA, LESS FATIGUE SKIING BETTER

The Kastelaar respect your physical: low vibration are the best ally for the preservation of your body reducing the risk

of microtrauma and make you less tired skiing better with greater fluidity and overall performances.

We have feedback from several people before using our skis had, with other brands, back pain and knee and, if not trained, were very tired. Using our have not encountered such pain and physical problems, skiing with the same intensity as before and with less fatigue.

## MADE TO LAST

The wood has a great resistance to shocks, fatigue and vibration over time. Furthermore dents or scratches do not propagate as instead happens in composite materials such as carbon or glass fiber. the exposed wood of Kastelaar does not allow to hide any structural damage Unlike metal skis also. It is often said that the metal skis after a couple of seasons no longer have the same characteristics. It's true: the reason is linked to the fact that the mate-

## 90% OF WOOD

Wood is a natural carbon fiber, and is the material that most resembles it in nature for mechanical characteristics (it contains almost 70% of carbon.). The wood has indeed

outstanding mechanical properties able to overcome in time and in many artificial materials performance, with the advantage that it is an environmentally friendly material, durable, lightweight (for equal

volume ash weighs 5,7 times less carbon fiber) reliable, non-polluting, easy to work. If combined with composite materials and processed with cutting-edge technologies, as does Kastelaar, to neutralize the weaknesses and handle flex and twisting in a timely manner, then you will find yourself in front of an excellent material, new, modern, highly advanced and amazing that nothing It has to do with the wood idea that you have and that will not ski, but fly!

## MULTIRADIUS

With Kastelaar You're always deciding the turn radius and in the style you prefer. You can ski in carving or sliding with the same skis!

Move from a sliding to carving and do the opposite has never been so easy and modern thanks to the particular curve of the tip.

Higher security and less risk of distortion to your knees, less fatigue for your back. On the next page we explain why.

## TEN YEARS TESTED !!!

The Kastelaar have tested for over ten years in all snow conditions and temperature throughout the Alps.

They have also been used for months in Arctic and Norway in extreme conditions with temperatures ranging from -40 to -5 Celsius.

In both cases, they never reported any problem or damage and with the maximum satisfaction of testers (athletes, explorers, ski instructors, normal people).

If the wood is always trying to be in equilibrium with the external environmental moisture (the moisture content varies according to the season, usually by a 9% to 16%), in Kastelaar this has no particular structural or aesthetic consequences, because use of techniques able to minimize such variations. If required with normal precautions, the ski dimensional variations (hundredths of a millimeter per centimeter), are absolutely negligible and do not affect the quality of skiing.

# SPECIAL EDITIONS

## NEWCLASSIC

The passion for skiing is often born looking at a skiing champion, seeing his sporting exploits. Who has not dreamed at least once, as a child to become like him and maybe win the World Cup or to have his own skis? Our skis "Special Edition" will make you not win the Crystal Cup, but I can make you feel great emotions for performances and aesthetics.

NewClassic is the first modern collection classic skis in the market. We give you the chance to ski with the ski champions of the past as Zeno Colo of Celina Seghi saws Leo Gasperl, but with a modern twist and safely, again showing your perfect style combined skiing ... or that you have never learned because you have been using carving skis.

### ASPEN 1950 ZENO

### KANDAHAR 1949 CELINA

### LEO FUTURISTA

### 1936 FREE CLASSIC

#### The Zeno Colò ski

To mark the centenary of his birth in 1920 and Seventieth anniversary of victories in Aspen in 1950 Kastelaar has created a Special Edition in limited series called "Aspen 1950 Zeno." It is a fantastic solid wood skis ash, "classic" aesthetics and measures, but modern technology and materials, with no visible parts in carbon fiber, Kevlar and graphene, specially designed in collaboration with the grandson of Colo, Francesco Serarcangeli.

With Kastelaar "Aspen 1950 Zeno" you can ski on a piece of history: Zeno Colo "considered the father of alpine skiing, winning World Championships and Olympic Games, as well as the inventor of the position "egg", still used in the speed disciplines .

The ski has the original widths of the winner ski in Aspen, but with different length (cm 190 cm instead of cm 224), so as to allow skiing in classic style easily and safely, and has been chosen for the measurements of the ski very center modern offers optimal skiing finding himself at ease on all types of snow and trail, high or low speed, it is stable, precise, powerful, with zero vibrations.

Limited Edition.  
Height 190 cm  
Sidecut mm 91 - 74 - 85

#### The Celina skiing Seghi

For the birthday of the Snow Queen, Celina saws, this year on March 6 has made one hundred years, Kastelaar, designed this modern skiing vintage graphic that recalls in one of his skis, of course, colored white, His favorite color: Kandahar 1949 Celina". Celina Seghi was the only athlete in the world who succeeded in winning diamond of the prestigious trophy Kandahar K (the maximum for a skier).

In addition to this amazing prize he has racked up a number of victories and incredible places: from bronze in Aspen World slalom in 1950 and fourth places at the Olympics in St. Moritz and Oslo was 25 times Italian champion and climbed some 37 times on the podium in international competitions.

The ski that we designed resumes the measurements of one of the skis used to win the Kandahar diamond, but in a shorter measurement (cm 180, instead of cm 200) and has a completely wooden structure from carbon coiaudiuvata, kevlar and graphene, with slab and competition cut edge.

One easy but technical skis at the same time that allows you to ski with classical technique in all snow conditions and trail always with great satisfaction.

#### The Futurist ski winter sports

With skis was a real god, he represented the incarnation in skiing the current dynamics of Futurism: the fastest skier in the world, a champion, a great technician, an inventor, mechanic, bob builder, an esthete of the ski, so as to be even a point of reference today. Beautiful and irresistible charm, photographer, male model, actor, fashion designer, innovative, elegant, brave and daring.

He was the coach of Zeno Colo and blues, then taught skiing at royalty, actors and Hollywood stars. The Austrian Leo Gasperl opened new horizons to skiing, scoring and living as the undisputed protagonist of the golden age of winter sports. The "Leo Futurista" is an elegant ski, timeless charm, but also able to excite in every rim, with any snow and trail, a bit 'like him, still able to project ourselves in another dimension, made sports, aesthetic pleasure and good life.

A mix of classic and modern sidecut ski in style wherever you want. Solid wood with of carbon, graphene, kevlar. In limited edition. Colors: blue clair, red, black, green, bleu.

Height 190 - 180 - 170 cm  
Sidecut mm 92 - 68 - 84

#### Skiing's golden age the winter sports

The classic skiing to ski with style on piste, off-piste or just telemark. Ideal for fantastic perfectly controlled drifting and bear the sound of the snow under your feet. Or just to sip a cocktail at Moritzino or Cortina Faloria. Priceless.

sshhhhhhhhhhh

and again

sssshhhhhhhhhhh

Now it's time again to challenge yourself what you want to try more, now that you know carve, if you do not learn to ski in style, enjoying the snow and the beauty of nature? You'll bear that strange sensation of learning to ski again.

A mix of classic side cuts and high technology. Solid wood with carbon fiber, graphene, kevlar.

In limited edition.  
Height cm 180 -170  
mm sidecut 124 - 88-105

## CARVING SKIS

You can ski with great satisfaction with carving skis born from experience and the advice of former athletes and great champions like Carlo Senoner (Slalom World Champion) and Beba Schranz who support Kastelaar philosophy.

### CARLO SENONER

*The Carlo Senoner ski*

For the fiftieth anniversary of the victory in slalom Special Portillo in 1966 Kastelaar has created a Special Edition in limited called "Carlo Senoner".

It is a fantastic solid wood skis to ash with parts not visible in carbon and kevlar specially designed in collaboration with the ski World Champion Carlo Senoner. The Kastelaar "Carlo Senoner" is a suitable ski in every situation is characterized by the very good stability, ease of handling, the pulse that creates speed, the driving and for the ease of passing from one curve to another even in the short. It offers optimal skiing being at ease on all types of snow and trail, literally floating on moves and wet snow.

Limited edition, written, steel badge and Italian flag in the back.

Height 169 cm  
sidecut 124 mm - 72-108

The skis are available only in Selva di Val Gardena at the Hotel Chalet Portillo 1966 owned by the family Senoner.

A famous Hotel for hosting in addition to the President of the Italian Republic, great skiing champions: Ingemar Stenmark and Alberto Tomba.

### BEBA SCHRANZ

*The Beba Schranz ski*

Kastelaar has produced a special edition called "Beba Schranz".

A tribute that we dedicate to Beba, estimated athlete of the Italian national team, which has given so much to skiing and mountains, close collaborator of Rolly Marchi, as well as a veritable institution in that Macugnaga, worthy representative of all women who love the mountains and snow.

Here his judgment: "These skis struck me immediately for their light weight enough to try an almost physical pleasure. Using them I appreciated the sincerity, handling and stability: in short rays are very funny and precise, in large medium and fast corners are very stable. When skiing impose the constant changes of pace I appreciate the ease with which allow me to switch from one type of curve to another.

And I have further and pleasantly surprised these days that you spent in the morning ice to snow gear in the afternoon, have adapted very well to all types of snow, I'm so happy and then you want to put their beauty, simple, elegant, timeless?"

In limited edition, written in steel  
Height 159 cm  
Sidecut 124 mm - 72-108

## LE MONOSKI

The Monoski" could not miss in the Special Editions of Kastelaar. The Kastelaar Monoski will help you in a different way the snow, not only speed, but extreme pleasure of skiing with open arms to the world and others.

It's time to try new emotions to yourself, not only related to the speed of skiing in a different way.

The Monoski is an idea born in France in 1961 and is probably one of the most controversial and fascinating at the same "Cult" objects that were invented for fun in the snow.

### CAPRICE DE DIEU

### SORCIO VERDE

*The Caprice de Dieu* has the most loved forms for generations of fans of this cult object.

Enjoy, enjoy, and even enjoy, always with open arms and mouth.

The Caprice de Dieu has the soft tip and tail that supports. Tip large before to enter easily in curve and to float in deep snow and narrow tail and then you make a sssssshhhhh infinite.

*Sorcio Verde* (a italian saying which means envy) is what you do see each other down, nothing but Snowboard! Modern in side cuts, skiing inclined as before you even dreamed of doing.

Let yourself be carried safely and enjoy the full pleasure that gives you this monoski, suitable for all snow day  
Soft tip and tail claims.

Solid wood, carbon fiber, graphene, kevlar.  
Length: 170, 180

# FOR ROCKET MEN

SQUADRACORSE GS - 185

HOTDOG 175

SQUADRACORSE SL 165

*If you do not try you do not believe: the SquadraCorse (in honor of one big ski-seventies) distills the best of modern ski with the best qualities of those FIS and straight allowing you to always ski in safety with great ease, without compromise.*

*The Dinamic Carving effect provides an additional edge over which the Sport version, is a real racing skis.*

*Ash or Hickory finish.*

*Measurements: 185 cm*

*Sidecut: mm 96-65-84*

*(FIS - WC) cm 195 on request*

*HotDog is skiing freely and safely among the worst bumps and all kinds of situations and snow. A reactive, technical skiing, but easier, with an excellent grip on all types of snow, extremely pleasant and without vibration.*

*Measurements: 175 cm*

*Sidecut: mm 95-65-84*

*You only have to think of skiing by winning.*

*Designed to allow a change of telepathic edge at all times.*

*At the foot it seems not to have it: it is lightweight and well balanced between the tip and tail.*

*It is easy and technical at the same time, solid, a feature common to all the great ski. Astonishing fluidity without vibration, which helps to save energy and not to tire out, allowing you to give the best of yourselves to the last door or the last curve of the day. Very precise and stable in all situations,*

*in the second part of the curve has a natural acceleration, progressive and exciting without deadlocks that makes you to ski freely and safely in every type of track and snow.*

*Measurements: 165 cm*

*Sidecut: radius > 13 mt.*

*(conforms F.I.S. WorldCup)*

# ALPINE

## QUATTROVALVOLE

## VERTIGINE BIANCA

## LEPRE BIANCA

### ADRENALINA

*Ski chameleon, unique on the market, thanks to the special sidecut multi-beam. It arises in a location next to racecarver world. It is suitable for every use and every snow condition, still decided in the ball corner and smooth output.*  
 Height cm 149, 159, 169  
 Sidecut mm 120-66-98

*Great high-profile skiing: speed of execution and particularly high stability, edge grip, safety in the management of wide curves, always accurate and easy to set up. While being inserted into the race carver category broadly embraces the feelings that the real skiing giant can give. Walter Galli is in fact enthusiastic: "A true ski giant, which makes you feel the snow."*  
 Height cm 169, 179, 190  
 Sidecut: mm 114-70-99.5

### STELLA ALPINA

*The Vertigine Bianca stands out for excellent stability, the handling, the pulse that creates speed, the driving and for the ease of passing from one curve to another even in the short. It offers optimal skiing being at ease on all types of snow and trail, literally floating on moves and wet snow. A great skiing.*  
 H cm: 159, 169, 179  
 mm 124 - 72 - 108

*Designed for a female audience, the Stella Alpina is the Kastelaar ski that stands out due to excellent stability, handling, impulse conduction and the ease to switch from one to another curve. She is able to offer an optimal skiing without ever putting in trouble and is at ease on all types of snow and path, resulting in a ski that transmits a lot of confidence.*  
 Height cm 149, 159, 169  
 Sidecut mm 124-72-108

*A new shape generation E.C.S. technology based. Quick and agile as a white hare in the snow: a new shape generation for ski of medium width that is able to make a difference in any situation with ease, relaxed and not tired at all. A cocktail of solutions perfectly blended with each other that make you taste the best of skiing: technician in hard and easy in the soft, maximum pleasure! We do what you want and always with satisfaction and a lot of emotions and tirelessly mounting ski bindings tractional or telemark. "Lepre Bianca is fast, solid on hard snow and easy on athers snows". Great ski!"*

JEAN

CLAUDE ELLENA

*Ideal also for women ski passionate seeking an width average ski.*

*35 cm rocker and camber combined with Dynamic Effect Spoon tip and tail and zero vibrations mean large estate, progressive and so fluency in all snow conditions, also iced.*  
 Height cm 159, 169, 179  
 Sidecut mm 124-84-108

## POLVERIERA

## 1936 ALPINO 90

## 1936 ALPINO 100

## CRISTALLO

*The most tested model of our collection in extreme situations and always with excellent results: easy and very reliable*

*The model most eclectic production that directs 50% alpine and 50% off-piste, thanks to the generous size of the ski that allows excellent buoyancy. It confirms a technical skiing, for skiers different technical level. Depending on the measurements can give the best of themselves in the medium-large or medium narrow curves. The 178 and 188 is chosen by the guides, who goes on foot with skins and those who dare in the mountains.  
Height cm 159 cm, 169, 179, 189  
Sidecut mm 132-84 - 114*

*Designed specifically for telemark in collaboration of telemark ski Instructor Jean Cloude Ellena, he has the same sidecut 1936 Alpino 100, but it is closer to be more suitable for use on the ski run. The 90 proves to be a great skiing, eclectic and performance in any situation and provides good buoyancy even off-piste. Excellent stability even on hard snow, very stable at high speeds, rapid changes in, vibration, offers skiers a great sense of security.*

*Height: 169 cm, 179, 188  
124 mm sidecut - 90-114  
Rocker cm 35  
Weight: 1710 gr c.a version Pure*

*Heir to the legendary Alpine 1936, completely redesigned and re-engineered the new model earns in purity of lines and quality of skiing, further improved. Has 35 cm NACA profile rocker and tail slightly raised for better support in the deep snow. Used by many telemarkers confirms a ski equipped with excellent quality. It offers great comfort and is great fun and riestendo Readily to accommodate the skiing of each.*

*Height cm 169, 179, 188  
Sidecut mm 132-100-124  
Weight: 1810 gr c.a version Pure*

*The Cristallo is the Kastelaar skis designed to be easy and not very strenuous, ideal for its softness also for women ski passionate seeking an width average ski and telemark. With excellent technical content, pike stands for excellent stability, docile handling, but also aggressive when needed, the impulse conduction and the easy to switch from one to another curve. Just like a feline. Excellent buoyancy on fresh snow thanks to the new NACA aeronautics profile, able to compete with much larger ski.  
Height cm 169, 179, 188  
Sidecut mm 124 - 99-111  
Traditional camber with rocker 480 mm front, 350 mm rear  
Weight 179 Pure: 1710 gr c.a*

# FREE

## GHIACCIO

## LUPO BIANCO

## NIMBUS

## PUNTA NERA

*Ski equipped with excellent quality, good comfort, great fun, intuitive and easy. Also suitable for those who have never skied off-piste. Depending on the measures gives the best of himself in medium-large or medium narrow curves. It has a good grip edge and surprises for its great buoyancy also at speeds no higher thanks to the NACA profile of the rocker that allows him to make the most of its width and the ease in changing direction, as to be appreciated in the paths in the woods.  
Height cm 169, 179, 190  
Sidecut mm 142-112-128  
Traditional camber with rocker 480 mm front, 350 mm rear  
Weight 179 version Pure: 1890 gr*

*Exceptional Lupo Bianco 179 in back country, among the best on the market ski, so as to have hit every tester. Among the trees the 179 is incredibly smooth thanks to the excellent edge grip, precise and progressive and speed can produce. The 190 is appreciated for its great stability and absence of vibrations. The NACA rocker in the tip combined with a slightly raised tail allows excellent rides and get more support in the deep snow. A great skiing, easy and by the excellent technical content.  
Height cm 169, 179, 190  
sidecut mm 142-120-130  
Traditional camber with rocker front 480 mm, rear 240 mm  
Weight 179 version Pure: 2090 gr*

*Nimbus is a real Twin Tip skis designed for performance and precision, with maximum enjoyment and control in every situation, even the limit. Made with the finest materials to withstand extreme stresses and large amount of Kevlar. About to take higher and higher flight into the clouds and land touching the walls, without ever tiring.  
Height cm 167, 173, 180  
Sidecut mm 110-84-100  
Weight 1540 gr*

*Light enough to go up easily, but especially rugged adding Kevlar in quantity to the pleasure of skiing down for real and safely. In the mountains safely is paramount and it is one thing the race, when you are many, one thing is the climb solo or with friends. You can not find at the top Cevedale at or just below the Gran Vernel with a broken ski, because it did nothing or too extreme... do not you agree?

*Sizes 180, 190 cm  
ski width: mm 74  
cut edge mm 2  
Ash or Hickory wood finiture*

# SNOW BOARD

*Kastelaar snowboards are born to offer enthusiasts fantastic sensations. The range is currently composed of two models, both designed for off-piste use. What is the most obvious difference compared to the other tables? The softness and the absence of vibrations caused by the solid ash wood with graphene and carbon fiber to reduce the torsion. There is no dead point along the whole curve and in the edge change and at the same time precision and stability, aspects which in turn translate into an unparalleled and exciting fluidity of action.*

## VISIONARY 01 PRO-S

*In solid wood, combined with carbon and graphene, inserted in a timely manner in order to better manage torsion and flex through the use of CAD parametric finite elements. The (DinamicSpoon) of the tip allows crazy surfing. It has a floating capacity that will strike you as the speed it is able to generate thanks to the N.A.C.A.: more lift as soon as the tip tends to go down, minimum friction and therefore very fast in normal conditions. Snowboard without vibrations at high speeds, stable, sensitive and precise, technical but easy. Elements that translate into a very high range of use. It demonstrates harmonic in every phase of the curve, without dead spots, allowing great fluidity of the action. Soft toe structure that progressively stiffens both longitudinally and laterally and structured tail that supports and at the same time accompanies the curve.*

## VISIONARY 02 PRO-S

*Large surface area and the tip's dynamic spoon assure great buoyancy, which will strike you as the speed that it is able to generate thanks to the N.A.C.A.: greater lift as soon as the tip tends to go down, minimum friction and therefore very fast in normal conditions. A minimal amount of carbon and graphene has been added to solid wood in order to better manage torsion and flex, all studied using c.a.d. parametric finite elements. Soft structure at the tip that progressively stiffens both longitudinally and laterally (DinamicSpoon) and with a structured and wide tail for long and fast turns. Also this board is vibration-free at high speeds, stable and precise, technical but still easy with a very high range of use.*

## Pure

exposed wood, excellent performance, surface treatment with epoxy and an invisible layer of glass fiber for a greater protection against shocks and subsequent hands hand dates brush with a special paint ski.

## Carbon Comfort

aggressive and modern appearance date from the tip of carbon and better comfort by making greater use of kevlar. This model, on request, you can have without carbon part aesthetic, but always with the same technical characteristics

## Passion

the Kastelaar ski old, the wood pure, for those seeking the pleasure and not the performance at all costs. A ski that pays for natural and aesthetic sensations and will age you.

## Sport

The Kastelaar ski designed to deliver maximum performance and sensations, especially at high speeds.

A racing. Greater torsional stiffness, possible (depending on the model) longitudinal stiffness, further improved stability, the almost total absence of vibrations. Model suitable for people with physical and or weight than the average.

## Sport Carbon

the performance of a Kastelaar Sport combined with aggressive modern aesthetics and comfort features of the carbon structure.

## Superlight

particularly light version proposed for freeride skiing. Solution for skialp and want lighter. Although still robust it instead of the standard appears to be structurally lower and not suitable for particularly demanding or dangerous descents. Are used for the purpose of wood varies essence and assembled with the same techniques used to build the wooden boats.

## Extreme Superlight

lightened structure of the ski and at the same time strengthened by greater use of carbon and Kevlar. The structure is approaching to the standard of that wood, but not for the number of cycles of fatigue over time. Are used for the purpose of wood varies essence and assembled with the same techniques used to build the wooden boats.

**Each version, both aesthetic and performance, can be ordered in Ash wood or Hickory finish. The Superlight versions instead are made with various wood type.**

## Must

customized aesthetics skis with inserts specially created steel and / or wood pieces of various colors or handpaint. A unique ski, designed with you, for you.

So what are you waiting for?

Do it now!

We have different payment solutions.

We prefer bank transfers, but you can also pay by credit card and paypal.

There is also the possibility to pay online directly without contacting us, but it could be that you could lose the discounts on the price on different occasions.
